and is capable of ranges between li and 26 nautical miles. It can carry conventional of nuclear warheads. It is not known if the frog units in Cuba have been provided with nuclear warheads.

The 24 surface-to-air mismile sites are manned and supported by an emilmated 6,000 Soviet mir defense troops. In addition, there are an unknown number of Soviet troops manning other elements of the inland's mir defense system--radar, communications, filter centers, and fighter interceptor units which include MIG-21 (Fishbed) jets.

There is no indication that Cuban personnel have control of the IL-28 (Beagle) jet light bombers being assembled on the island. It is assumed there-fore that some additional hereived in this personnel are incolved in this program.

The status of the coastal defense cruise missile installations is not known, but, they too are probably massed by Soutet personnel. Four and the mably five of these installations have been located in Cohe.

the number and location of these iscilities are unknown, but they would probably be manned by military personnel.

All of these forces are probably in addition to lowist military personnel assisting and training Cubass 1. a military aid capacity; i.e., for naval ships, aircraft, and land armanents being turned over to Cuba by the USSE.

## SOVIET EILITARY PORCES IN C. RA

viet troops deployed to the island. Figures cited below reflect known tables of organization within the USSE, and are probably higher than the cital figures for Cuba.

There are four Bovies armored combat groups is Oubs. tween 500 and 3,500 men, depending on its composition. They are located in camps near Artenise, Santiago de las Vezas. Remedics, and Holguin (see map with preceding article). Eacr group has highly mobile conposite forces equipped with some of the most modern Soviet respons--types which have not been released to non-Soviet units anywhere. The group at Santiage de las Togos was displaying en "elite" :rds usit badge, as Traorc: :ables, and the Red APRY STET BY the end of October.

There have been differenced in the types and quantities of equipment photographed at the locations of the four groups.

That group includes one medium (Y-54) tank battalion and some of the following anits:

armored recommissation, armored infantry, multiple rocket launcher, from artiliery tocket launcher, from artiliery tocket banper antitional missile, 130-mm. morter, 57-mm antitions gue, and engineer troops with sale.
